

## TIPS FOR CUE PRO APP

### **Move the CUE app to the home screen:**

- To add the CUE app to the main screen of your Firestick, go to the applications section, which is the three squares and the plus sign.
- Navigate to the CUE app.
- Then long press the center button. (You can also use the hamburger button to move the icon if you would prefer.)
- You can then move the app up to the top of the screen with your frequently used apps.

### **Add favorites:**

- Select the category Live TV, Movies, or TV series.
- With your selection highlighted, long press the center button and it will be added to your favorites.
- Once it is added to your favorites a star icon will appear in the upper right corner.
- To remove just follow the same procedure. Highlight the channel or movie with the star icon and long press the center button. This will remove it from your favorites.
- Once you have selected your favorites you can access them by selecting the home icon in the menu or by selecting the heart icon in the upper right corner.

### **Global content search:**

- To search all content categories within the CUE app make sure that the home icon is selected in the left hand menu.
- Then press up to highlight the menu (hamburger) icon and then press right and highlight the magnifying glass icon.
- Then highlight the search bar and press the center button to bring up the keyboard. (Make sure that the keyboard is displayed in order to use the voice search.)
- Once you have selected your search term press next.
- This will bring up options across all categories.
- You can also search within the categories if you would prefer.

### **Closed captions and audio:**

- To activate closed captions while you are watching a program press the center button and a menu will appear across the bottom. Scroll over to the CC icon and select it to activate closed captions.
- To choose the audio track press the center button and in the menu at the bottom select the music note and you can choose from the available audio tracks.

### **Multi-screen mode:**

- To use the multi-screen function navigate to the icon with the 4 rectangles in the upper right corner of the screen.
- To add a channel select the plus icon and choose your preferred channel.
- Then you can go to the rest of the screens and pick channels.
- The icon next to the plus sign will allow you to choose the screen layout.
- You can use the speaker icon to choose the feed that you would like to listen to.
- To exit the multi screen mode hit the back button and select yes to exit.

### **Back up favorite channels:**

- Once you have selected your favorites, from the main menu on the left, go into the CUE app settings (gear icon) in the lower left corner.
- Then select backup and restore.
- Then choose cloud backup. This will save all your preferences for your account.
- If you reinstall the app go back here and then choose restore from cloud.
- Please complete this process before reloading or reinstalling.
- **Note: This feature will not save recordings.**
